## **Boost your Search and Page Ranks**

Modern search engines work with page ranks. This means that, the more often your website is linked by foreign websites (as the DAHAB explorer is), your page rank will increase and your position in the search engine will get higher.

## **How often is DAHAB explorer and it's Content submitted to Search Engines?**

We reorganise and rebuild our meta data (the relevant data for the search engines) and the sitemap once a week and submit them to the search engines.

This helps a lot to tell the search engines that the DAHAB explorer is an active website and increases the page ranks and position within the search engine.
